

The best in yield, disease package and end-use characteristics – setting the new standard for CWAD on the Prairies for both farmers and end-users.

Advantages:

- Easy to thresh with consistent quality
- High test weight
- Excellent colour
- Good protein

Improved
resistance to FHB

Key Competitive Factors

- Very high-yielding
- Improved resistance to FHB
- Resistant to leaf & stem rust, common bunt
- Good leaf spot resistance
- Low Cadmium

"We have grown FP Genetics' AC[®] Transcend durum for the past two years. This variety straight cuts excellent and threshes easier than Strongfield. Grain quality looks excellent and has been consistent over the past two years. It has yielded very well on our farm which is great. AC[®] Transcend is a durum that will do well in our area and I recommend it for any grower in my area."
