

ABARTH

Yellow Pea

The Early Riser

Abarth peas are early maturing and have a short structure that results in top-of-class standability. Abarth peas come with a strong disease package, and large kernel size that is preferred by processors.

Highlights

- Short strawed, top-of-class lodging resistance
- Early maturity
- Competitive disease package
- Large kernel size

Parentage: Hardy/Tamora//Arthur/Cooper

ABARTH AGRONOMIC AND DISEASE DATA

Variety	Yield (kg/ha)	Yield (% of Cutlass)	Maturity (days)	Vine Length (cm)	Lodging (1-9)	TKW (g)	Seed Shape (1-5)	Seed Coat Breackage (%)	Protein (%)	Colour
Abarth	6043	114%	102.0	80	3.3	260.0	3	13.7	22.4	Y
Cutlass	5286	100%	103.0	77	4.7	218.0	2.9	4.4	23.3	Y
