

CDC Alba

Canaryseed

The highest-yielding yellow-groated canaryseed variety with excellent seed quality attributes

- Very high yields (117% of CDC Bastia)
- Medium maturity compared to current commercial varieties
- Medium stature with good lodging resistance

YIELD PERFORMANCE

CDC Alba

117%

CDC Bastia

100%

OVERALL CHARACTERISTICS

Maturity	Medium
Height	Medium
Growing Zone	All canaryseed growing areas (SK)
Lodging Resistance	Good
Test Weight	70.3 kg/hl
Thousand Kernel Weight	8.3 g
Seed Coat Color / Appearance	Yellow / Glabrous

CDC Alba

Technical Information

SK Varieties of Grain Crops - 2025

Variety	Yield % Check	Maturity Days	Height cm	Days to Heading	Test Weight kg/hl	Seed Weight g/1000
CDC Alba	117	97	90	56	70.5	8.0
